Contents

	Page
Foreword _____	6

CLAUSES

1	Scope _____	7
2	Normative references _____	7
3	Definitions _____	7
4	Materials _____	10
5	Dimensional requirements _____	10
6	Testing _____	12

ANNEXES

A	Load test on 3-bay x 3-lift modular scaffolding system _____	13
B	Lateral load test (1-bay x 3-lift set up) _____	16
C	Load test on adjustable base plate _____	17
D	Load test on node of vertical standard _____	18
E	Load test on metal decking _____	20
F	Load test on wall tie _____	23
G	Requirements and quality control of the paint coating _____	25

TABLES

1	Wall thickness and yield stress of steel tubes _____	10
2	Dimensions and tolerances for components of modular scaffold _____	11
3	Classification of test results _____	27

FIGURES

1	Typical components of a modular scaffold system _____	9
2	Load test on 3-bay x 3-lift modular scaffolding system _____	15
3	Load test on adjustable base plate _____	17
4	Load test on node _____	19
5	Deflection and bending test _____	20
6	Load test on gripper fittings (hooks) of metal decking _____	21
7	Deflection and 'punching' test _____	22
8	Tensile test on wall tie _____	23
9	Compressive test on wall tie _____	24
10	Single cutting tool _____	28
11	Multiple cutting tool _____	28

Foreword

This Singapore Standard was prepared by the Technical Committee on Construction Management under the purview of the Building and Construction Standards Committee.

As a result of the revision of SS 280 : 1984 – ‘Specification for frame scaffoldings’, the following two parts were developed:

Part 1 : Frame scaffoldings

Part 2 : Modular scaffoldings

In preparing this standard, reference was made to:

1. EN 12810 Façade scaffolds made of prefabricated components
Part 1: 2003 Products specifications
2. EN 12811 Temporary works equipment
Part 1 : 2003 – Scaffoldings – Performance requirements and general design
Part 2 : 2004 – Information on materials
3. SS 280 Metal scaffoldings
Part 1 : 2006 Frame scaffoldings

Acknowledgement is made for the use of information from the above EN standards.

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. SPRING Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

1. *Singapore Standards are subject to periodic review to keep abreast of technological changes and new technical developments. The changes in Singapore Standards are documented through the issue of either amendments or revisions.*
2. *Compliance with a Singapore Standard does not exempt users from legal obligations.*

Specification for metal scaffoldings, Part 2 : Modular scaffoldings

1 Scope

This Singapore Standard specifies the minimum requirements for steel modular scaffolding for use as temporary structures on which persons work and which provide support for the materials used. It is applicable to construction, maintenance, repair and demolition work, ship building and repair, petrochemical and other industries.

2 Normative references

The following referenced standards are indispensable for the application of this standard. For dated references, only the edition cited applies. For undated references, the latest edition (including any amendments) applies.

BS EN 10219	Cold formed welded structural hollow sections of non-alloy and fine grain steels. Part 2 : 2006 Tolerances, dimensions and sectional properties
ISO 1461	Hot dip galvanized coatings on fabricated iron and steel articles – Specifications
ISO 2409	Paints and varnishes – Cross-cut test
SS 5:	Methods of test for paints, varnishes and related materials Part G1– Determination of resistance to continuous natural salt spray Part H3 – Designation of degree of rusting
SS 311	Steel tubes and fittings used in tubular scaffolding
