

**Methods of test for paints, varnishes and related materials**  
**Part C6 : Determination of low concentrations of lead, cadmium and cobalt in paint by atomic absorption spectroscopy**

**AMENDMENT NO. 1**

July 2021

**1. Page 5, Clause 1 – Scope**

In the first sentence, *replace* the determination of lead contents “between 0.01 and 5%” with “between 50 ppm and 50,000 ppm”.
