

Methods of test for paint, varnishes and related materials
Part B14 : Pigment content (centrifuge)

AMENDMENT NO. 2

July 2019

1. Page 5, Clause 2.2

Replace “**Centrifuge**. A centrifuge with a multi-unit head a speed of around 2,000 rpm, and an individual tube capacity of 60 ml minimum” with the following:

Centrifuge. A centrifuge with a multi-unit head a speed of around 1000 – 2000 *g*, and an individual tube capacity of 60 ml minimum.

Note 1 – Calculate the gravity (*g*) developed by the centrifuge as follows:

$$g = 1.118 \times 10^{-6} \times r \times n^2$$

where:

r = rotating radius, mm, and
n = rotating speed, r/min.
