

Specification for steel for the reinforcement of concrete – Weldable reinforcing steel  
– Bar, coil and decoiled product

## **AMENDMENT NO. 1**

August 2024

### **1. Page 9, 2 Normative references**

*Replace* the following standards and update accordingly throughout the standard:

- “BS EN 1766:2000” with “BS EN 1766:2017”;
- “BS EN ISO 15630-1:2002” with “BS EN ISO 15630-1:2019”;
- “SS EN 1992-1-1:2008” with “SS EN 1992-1-1:2008(2015)”.

### **2. Page 13, 7.1 Chemical composition**

*Replace* paragraph 1 with the following:

The values of individual elements and the carbon equivalent shall not exceed the limits given in Table 2. In addition, all other intentionally added elements, except those included within the carbon equivalent formula, shall be below the limit values specified in BS EN 10020:2000, Table 1.

### **3. Page 24, 8.2.4 Traceability and test reports**

In paragraph 2, *replace* item (a) with the following:

- (a) the cast number and cast analysis, including all specified elements and elements used in the calculation of the carbon equivalent value, and all intentionally added elements;

### **4. Page 38, A.8 Test report**

Under (e), *replace* “SS 560:2010” with “SS 560:2016”.
