## **Foreword**

This Singapore Standard was prepared by the NII Technical Committee under the direction of the Information Technology Standards Committee.

This is Part 5 of the six-part NII standards.

The Singapore NII aims to evolve a nation-wide platform for information sharing and communication. It is essential that the various disparate networks on the NII can connect and interoperate with each other. It is therefore critical to establish open standards to promote the quality, efficiency, compatibility and competitiveness of products and services on the NII.

### **NOTE**

1. *Singapore Standards are subject to periodic review to keep abreast of technological changes and new technical developments. The revisions of Singapore Standards are announced through the issue of either amendment slips or revised editions.*
2. *Compliance with a Singapore Standard does not exempt users from legal obligations.*
