

**SPECIFICATION FOR LP GAS AND NON-REFILLABLE GAS CANISTERS
FOR PORTABLE GAS COOKERS**

ERRATUM NO. 1

April 1998

1. **Page 11, Subclause 8.2.7**

Replace the entire subclause with the following text:

8.2.7 Pressure-resistance test. Two inspections shall be carried out as follows:

- (a) **Deformation.** Apply water pressure gradually to the canister²⁾ using the apparatus equivalent to or superior to the one shown in Figure 3. After holding the canister at 1.3 MPa for 30 s, observe visually whether any part of the canister has deformed.
- (b) **Bursting.** Examine each part of the canister for signs of bursting when the pressure is applied at 1.5 MPa using the same method described in step (a).

²⁾ A manufactured canister shall be used. If filled, it shall be emptied by purging.
