This Technical Reference was endorsed by the Management Systems Standards Committee on behalf of the Singapore Standards Council on 17 August 2017.

First published, 2017

The Management Systems Standards Committee, appointed by the Standards Council, consists of the following members:

	<b>Name</b>	<b>Capacity</b>
<b>Chairman</b>	: Mr Daniel Steele	<i>Individual Capacity</i>
<b>Secretary</b>	: Mr Steven Phua	<i>SPRING Singapore</i>
<b>Members</b>	: Mr Go Heng Huat	<i>Ministry of Manpower</i>
	Ms Margaret Heng Chee Bee	<i>Singapore Hotel Association</i>
	Mr Koh Yeong Kheng	<i>Association of Small and Medium Enterprises</i>
	Mr Kumar Selvakumar	<i>Singapore Quality Award Management Committee</i>
	Prof Lee Pui Mun	<i>SIM University</i>
	Ms Annie Lin	<i>Singapore Workforce Development Agency</i>
	Mr Ong Liong Chuan	<i>Individual Capacity</i>
	Mr Seah Seng Choon	<i>Consumers Association of Singapore</i>
	Mr Harnek Singh	<i>Individual Capacity</i>
	Mr Birch Sio	<i>Singapore Manufacturing Federation</i>
	Ms Lynn Tan	<i>Singapore Retailers Association</i>
	Mr Ronald Tan	<i>Singapore Productivity Association</i>

The Working Group on Conformity Assessment (CASCO), appointed by the Management Systems Standards Committee to assist in the preparation of this standard, comprises the following experts who contribute in their *individual capacity*:

	<b>Name</b>
<b>Co-Convenors</b>	: Dr Lee Tong Kooi Mr Ngiam Tong Yuen
<b>Secretary</b>	: Ms Aruna Charukesi Palaninathan
<b>Members</b>	: Mr Heng Hoon Jee Dr Ho Teck Tuak Dr Danny Ker Ms Lee Ham Eng Mr Kenneth Liang Ms Jaime Lim Yin Yin Mr Stanley Ong Mr See Boon Ping Mr Sze Thiam Siong

**Members** : Mr Than Soe  
Ms Delfin Yeo  
Mr Yusooof Aynuddin

The organisations in which the experts of the Working Group are involved are:

*Building and Construction Authority*  
*Health Sciences Authority*  
*Intertek Testing Services (S) Pte Ltd*  
*Ministry of Manpower*  
*Monsunque Pte Ltd*  
*Setsco Services Pte Ltd*  
*Singapore Quality Institute*  
*Singapore Welding Society*  
*Society of Loss Prevention*  
*SPRING Singapore*  
*The Institution of Engineers, Singapore*  
*TÜV Rheinland Singapore Pte Ltd*  
*TÜV SÜD PSB Pte Ltd*

## National Foreword

This Technical Reference (TR) was prepared by the Working Group on Conformity Assessment (CASCO) under the direction of the Management Systems Standards Committee.

This standard is identical with ISO/IEC TS 17023:2013 published by the International Organization for Standardization.

Where appropriate, the words “Technical Specification” shall be read as “Technical Reference”. The reference to International Standards shall be replaced by the following Singapore Standards:

International Standard	Corresponding Singapore Standard
ISO/IEC 17000	SS ISO/IEC 17000
ISO/IEC 17021	SS ISO/IEC 17021
ISO/IEC 17065	SS ISO/IEC 17065
ISO/TS 22003	TR ISO/TS 22003

This TR is a provisional standard made available for application over a period of three years. The aim is to use the experience gained to update the TR so that it can be adopted as a Singapore Standard. Users of the TR are invited to provide feedback on its technical content, clarity and ease of use. Feedback can be submitted using the form provided in the TR. At the end of the three years, the TR will be reviewed, taking into account any feedback or other considerations, to further its development into a Singapore Standard if found suitable.

Attention is drawn to the possibility that some of the elements of this TR may be the subject of patent rights. SPRING Singapore shall not be held responsible for identifying any or all of such patent rights.

### NOTE

1. *Singapore Standards (SS) and Technical References (TR) are subject to periodic review to keep abreast of technological changes and new technical developments. The changes are documented through the issue of either amendments or revisions.*
2. *Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. SPRING Singapore shall not be liable for any damages whether directly or indirectly suffered by anyone as a result of the use of any SS or TR.*
3. *Compliance with a SS or TR does not exempt users from any legal obligations.*

## **Foreword**

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of conformity assessment, the ISO Committee on conformity assessment (CASCO) is responsible for the development of International Standards and Guides.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

In other circumstances, particularly when there is an urgent market requirement for such documents, a technical committee may decide to publish other types of document:

- an ISO/IEC Publicly Available Specification (ISO/IEC PAS) represents an agreement between technical experts in an ISO working group and is accepted for publication if it is approved by more than 50 % of the members of the parent committee casting a vote;
- an ISO/IEC Technical Specification (ISO/IEC TS) represents an agreement between the members of a technical committee and is accepted for publication if it is approved by 2/3 of the members of the committee casting a vote.

An ISO/PAS or ISO/TS is reviewed after three years in order to decide whether it will be confirmed for a further three years, revised to become an International Standard, or withdrawn. If the ISO/PAS or ISO/TS is confirmed, it is reviewed again after a further three years, at which time it must either be transformed into an International Standard or be withdrawn.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC TS 17023 was prepared by the *ISO Committee on conformity assessment (CASCO)*.

It was circulated for voting to the national bodies of both ISO and IEC, and was approved by both organizations.

## **Introduction**

This Technical Specification provides guidance on the application of the relevant requirements of ISO/IEC 17021:2011 for determining the duration of management system certification audits. It provides certification bodies with a framework for achieving a basic level of consistency for determining the duration of management system certification audits. It can be also considered for the determination of duration of other types of audits.

The growth in the number of management system standards and certification schemes has highlighted the need for a document providing guidance to ensure that the factors influencing the duration of management system certification audits are considered.

This Technical Specification enables clients of certification bodies and other interested parties (e.g. scheme owners, regulators, accreditation bodies) to understand how different factors contribute to the duration of management system certification audits.

This Technical Specification does not define tables, formulas, or other methods to calculate the duration of management system certification audits for specific schemes, but it identifies factors to be considered when such tables or formulas are developed.

In this Technical Specification, the following verbal forms are used:

- “should” indicates a recommendation;
- “may” indicates a permission;
- “can” indicates a possibility or a capability.

The verbal form “shall”, which indicates a requirement, is not used in this Technical Specification because only guidance is provided.

Further details can be found in the ISO/IEC Directives, Part 2.

# Conformity assessment — Guidelines for determining the duration of management system certification audits

## 1 Scope

This Technical Specification provides guidelines for determining the duration of management system certification audits, to the bodies providing audit and certification of management systems and to those that develop and maintain certification schemes.

NOTE 1 This Technical Specification is also intended to address the needs of other interested parties (e.g. regulators, accreditation bodies) when determining the duration of management system certification audits.

NOTE 2 Where additional specific requirements related to the duration of management system certification audits have been established for a specific certification scheme (e.g. ISO/TS 22003 for food safety management systems) or other requirements as established by scheme owners or regulators, these can be applied.

## 2 Normative references

The following referenced documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
