This Singapore Standard was approved by the Building and Construction Standards Committee on behalf of the Singapore Standards Council on 8 October 2015.

First published, 1997
First revision, 2005
Second revision, 2015

The Building and Construction Standards Committee, appointed by the Standards Council, consists of the following members:

	Name	Capacity
Chairman	: Mr Chan Kok Way	<i>Member, Standards Council</i>
Deputy Chairmen	: Er. Chew Keat Chuan	<i>Building and Construction Authority</i>
	: Mr Larry Ng Lye Hock	<i>Urban Redevelopment Authority</i>
Secretary	: Ms Jo Ng	<i>Institution of Engineers Singapore – Standards Development Organisation</i>
Members	: Mr Bin Chee Kwan	<i>National Environment Agency</i>
	Ms Barbara Bok	<i>SPRING Singapore</i>
	Er. Chan Ewe Jin	<i>Institution of Engineers Singapore</i>
	Er. Chee Kheng Chye	<i>Housing & Development Board</i>
	Mr Chng Chee Beow	<i>Real Estate Developers' Association of Singapore</i>
	Mr Dominic Choy	<i>Singapore Contractors Association Limited</i>
	Er. Paul Fok	<i>Land Transport Authority</i>
	Mr Goh Ngan Hong	<i>Singapore Institute of Surveyors and Valuers</i>
	Mr Goh Peng Thong	<i>Individual Capacity</i>
	Mr Desmond Hill	<i>Individual Capacity</i>
	Er. Lee Chuan Seng	<i>Individual Capacity</i>
	Mr Benedict Lee Khee Chong	<i>Singapore Institute of Architects</i>
	Mr Rodney Lee	<i>Singapore Manufacturing Federation</i>
	Assoc Prof Leong Eng Choon	<i>Nanyang Technological University</i>
	Mr Darren Lim	<i>Building and Construction Authority</i>
	Dr Lim Lan Yuan	<i>Association of Property and Facility Managers</i>
	Er. Lim Peng Hong	<i>Association of Consulting Engineers Singapore</i>
	Er. Mohd Ismadi	<i>Ministry of Manpower</i>
	Assoc Prof Gary Ong Khim Chye	<i>National University of Singapore</i>
	Er. Yvonne Soh	<i>Singapore Green Building Council</i>
	Dr Tam Chat Tim	<i>Individual Capacity</i>
	Mr Christopher Tan	<i>Singapore Civil Defence Force</i>
	Er. Tang Pei Luen	<i>JTC Corporation</i>

The Technical Committee on Building Maintenance and Management, appointed by the Building and Construction Standards Committee and responsible for the preparation of this standard, consists of representatives from the following organisations:

	Name	Capacity
Chairman	: Dr Lim Lan Yuan	<i>Member, Building and Construction Standards Committee</i>
Deputy Chairman	: Er. Tang Pei Luen	<i>Member, Building and Construction Standards Committee</i>
Secretary	: Ms Barbara Bok	<i>SPRING Singapore</i>
Members	: Mr Eric Chan Kim Mun	<i>Association of Property and Facility Managers</i>
	Mr Bernard Cheng Kwang Meng	<i>SETSCO Services Pte Ltd</i>
	Prof Michael Chew	<i>National University of Singapore</i>
	Mr David Goh	<i>Fire Safety Managers' Association (Singapore)</i>
	Mr Goh Sheng Jie	<i>Housing & Development Board</i>
	Dr Kang Kok Hin	<i>Institution of Facilities Management</i>
	Mr Lee Wee Keong	<i>Singapore Civil Defence Force</i>
	Er. Leo Hee Long	<i>Energy Market Authority</i>
	Mr Lim Chong Yong	<i>Building and Construction Authority</i>
	Dr John Min	<i>Singapore Institute of Building Limited</i>
	Er. Ng Eng Kiong	<i>Singapore Green Building Council</i>
	Mr Ramahad Singh	<i>PUB, the National Water Agency</i>
	Dr Sun Qiqing	<i>TÜV SÜD PSB Pte Ltd</i>
	Mr Tan Ann Kiong	<i>Singapore Contractors Association Limited</i>
	Er. Roland Tan Juay Pah	<i>Institution of Engineers Singapore</i>
	Er. Yeow Mei Leng	<i>Association of Consulting Engineers Singapore</i>
Co-opted Members	: Mr Chue Fook Chee	<i>Individual Capacity</i>
	Mr K Ramanathan	<i>Individual Capacity</i>
	Mr Kua Soo Chong	<i>Individual Capacity</i>

National Foreword

This Singapore Standard was prepared by the Technical Committee on Building Maintenance and Management under the purview of the Building and Construction Standards Committee.

The standard is a revision of SS 509 : Part 1 : 2005. It is an identical adoption of BS 8221-1 : 2012 'Cleaning and surface repair of buildings – Part 1: Cleaning of natural stone, brick, terracotta and concrete' and is implemented with the permission of the BSI Standards Limited.

Where appropriate, the words 'British Standard' shall be read as 'Singapore Standard'. The reference to British Standards shall be replaced by the following Singapore Standards:

British Standard	Corresponding Singapore Standard
BS 8221	SS 509
BS 8221-2	SS 509-2

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. Enterprise Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

- 1. Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions.*
- 2. An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR.*
- 3. Compliance with a SS or TR does not exempt users from any legal obligations.*

Foreword

Publishing information

This part of BS 8221 is published by BSI Standards Limited, under licence from The British Standards Institution, and came into effect on 31 July 2012. It was prepared by Technical Committee B/560, *Conservation of tangible cultural heritage*. A list of organizations represented on this committee can be obtained on request to its secretary.

Information about this document

The start and finish of text introduced or altered by Corrigendum(a) No. 1 (and No. 2) is indicated in the text by tags C1 and C1.

Supersession

C1 This part of BS 8221 supersedes BS 8221-1:2000, which is withdrawn C1

Hazard warnings

WARNING. This British Standard calls for the use of substances and/or procedures that can be injurious to health if adequate precautions are not taken. It refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

Use of this document

As a code of practice, this part of BS 8221 takes the form of guidance and recommendations. It should not be quoted as if it were a specification and particular care should be taken to ensure that claims of compliance are not misleading.

Any user claiming compliance with this part of BS 8221 is expected to be able to justify any course of action that deviates from its recommendations.

Presentational conventions

The provisions in this standard are presented in roman (i.e. upright) type. Its recommendations are expressed in sentences in which the principal auxiliary verb is "should".

Commentary, explanation and general informative material is presented in smaller italic type, and does not constitute a normative element.

Contractual and legal considerations

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

Introduction

This British Standard is intended to give building owners, architects, surveyors, engineers, and contractors general information on cleaning.

Buildings are cleaned either to enhance their appearance or to assist maintenance and/or conservation.

Reasons for wanting to enhance appearance include:

- a) removal of disfigurements (e.g. stains, graffiti); revealing the nature, colour or details of a building; and
- b) unification of the appearance of a building that has been altered, extended or repaired.

Reasons for cleaning a building prior to maintenance and/or conservation include:

- 1) removal of harmful or undesirable deposits or applied materials from the fabric in order to slow down the rate of decay;
- 2) exposure of concealed defects, where surfaces are very thickly soiled, in order to establish the extent and nature of repairs required;
- 3) preparation of a surface for additional treatments; and
- 4) to fulfil the terms of a lease that requires periodic cleaning of a building.

Buildings have a variety of surfaces and materials and types of soiling that each need to be cleaned with appropriate methods and materials. It is essential to identify, in advance, the type, properties, and condition of masonry (in particular, whether it is limestone or sandstone) and jointing materials.

1 Scope

This part of BS 8221 gives recommendations on the removal or partial removal of deposits from the original surface or substrate of a building.

It includes the principal cleaning methods in use and the characteristics of surface deposits. It is applicable to the cleaning of natural stones, clay brick, calcium silicate brick, glazed and unglazed terracotta/faience, and cast concrete and concrete products such as cast stone, concrete brick and concrete blockwork.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

BS 1139-2 *Metal scaffolding – Part 2: Couplers – Aluminium couplers and special couplers in steel. Requirements and test method*
