This Singapore Standard was approved by the Food Standards Committee on behalf of the Singapore Standards Council on 7 September 2018.

First published, 2016

First revision, 2018

The Food Standards Committee, appointed by the Standards Council, consists of the following members:

	Name	Capacity
Chairman	: Dr Allan Lim	<i>Individual Capacity</i>
1st Deputy Chairman	: Dr Yap Him Hoo	<i>Agri-Food & Veterinary Authority of Singapore</i>
2nd Deputy Chairman	: Mr Lim Kay Kong	<i>Individual Capacity</i>
Advisors	: Prof Chua Sin Bin	<i>Individual Capacity</i>
	Mr Tan Khieng Sin	<i>Individual Capacity</i>
Secretary	: Mr Lee Huan Tiat	<i>Singapore Manufacturing Federation – Standards Development Organisation</i>
Members	: Mr Andrew Chan	<i>The Restaurant Association of Singapore</i>
	Dr Diana Chan	<i>Temasek Polytechnic</i>
	Ms Chong Nyet Chin	<i>NTUC Fairprice Co-operative Ltd</i>
	A/Prof Ralph E Graichen	<i>Agency for Science, Technology and Research</i>
	Mr Richard Khaw	<i>Singapore Institute of Food Science and Technology</i>
	Mr Sunny Koh Lai Hong	<i>Singapore Manufacturing Federation</i>
	Ms Adeline Leong	<i>National Environment Agency</i>
	Mr Lim Chee Kang	<i>Workforce Singapore</i>
	Mr Munir Hussain	<i>Majlis Ugama Islam Singapore</i>
	Mrs Ngan-Loong Mann Na	<i>Food Innovation Resource Centre</i>
	Dr Eunice Pang	<i>Health Promotion Board</i>
	Mr Rashid Hassan	<i>Commonwealth Capital</i>
	Mr Siew Kwok Siong	<i>Consumers Association of Singapore</i>
	Ms Bernice Tay	<i>Enterprise Singapore</i>
	Mr Wong Mong Hong	<i>Singapore Food Manufacturers' Association</i>
	Dr Yap Peng Kang	<i>Fraser and Neave, Limited</i>
	Ms Lianey Yeap	<i>SATS Catering Pte Ltd</i>
	Prof Zhou Weibiao	<i>National University of Singapore</i>

The Technical Committee on Food Safety, appointed by the Food Standards Committee and responsible for the preparation of this standard, consists of representatives from the following organisations:

	Name	Capacity
Co-Chairmen	: Dr Paul Chiew	<i>Individual Capacity</i>
	Mr Richard Khaw	<i>Individual Capacity</i>
Secretary	: Ms Esther Chia	<i>Singapore Manufacturing Federation – Standards Development Organisation</i>
Members	: Prof William Chen Wei Ning	<i>Nanyang Technological University</i>
	Mr Cheong Chung Kin	<i>Singapore Manufacturing Federation</i>
	Mr Chu Sin-I	<i>Individual Capacity</i>
	Dr Wayne Forday	<i>Ngee Ann Polytechnic</i>
	Mr Koh Boon Liang	<i>Individual Capacity</i>
	Ms Daisy Lai	<i>Nestlé Quality Assurance Center (Asia Oceania Africa)</i>
	Dr Lionel Lau Chin Leon	<i>Institute of Technical Education</i>
	Dr Li Dan	<i>National University of Singapore</i>
	Mr Liew Wai Leong	<i>GS1 Singapore Limited</i>
	Ms Emily Mok	<i>TÜV SÜD PSB Pte Ltd</i>
	Ms Rachel Ng	<i>TÜV SÜD PSB Pte Ltd</i>
	Ms Linda Quek	<i>LQ Consult</i>
	Ms Catherine Seah	<i>Nanyang Polytechnic</i>
	Mr Seah Seng Choon	<i>Consumers Association of Singapore</i>
	Mrs Ser-Low Wai Ming	<i>Singapore Polytechnic</i>
	Mr Teh Chun Siong	<i>National Environment Agency</i>
	Ms Joy Wang	<i>Singapore Accreditation Council</i>
	Mr Wong Mong Hong	<i>Singapore Food Manufacturers' Association</i>
	Ms Wong Suat Li	<i>NTUC Foodfare Co-operative Ltd</i>
	Ms Lianey Yeap	<i>SATS Catering Pte Ltd</i>

The Working Group on Food Safety Management Systems, appointed by the Technical Committee on Food Safety to assist in the preparation of this standard, comprises the following experts who contribute in their *individual capacity*:

	Name
Chairman	: Prof Chua Sin Bin
Secretary	: Ms Esther Chia
Members	: Mr Chu Sin-I
	Mr Koh Boon Liang
	Ms Lee Ham Eng
	Dr Leong Lai Peng
	Mr Lawrence Low
	Ms Linda Quek
	Mr Seah Seng Choon
	Mrs Ser-Low Wai Ming

Members : Mr Teh Chun Siong
Mr Wong Mong Hong
Ms Lianey Yeap
Ms Trionna Yio

The organisations in which the experts of the Working Group are involved are:

Consumers Association of Singapore
Gourmet Food Safety Consultancy
Institute of Technical Education
LQ Consult
National Environment Agency
National University of Singapore
SATS Catering Pte Ltd
Singapore Accreditation Council
Singapore Food Manufacturers' Association
Singapore Institute of Food Science and Technology
Singapore Polytechnic

National Foreword

This Singapore Standard was prepared by the Working Group on Food Safety Management Systems appointed by the Technical Committee on Food Safety under the direction of the Food Standards Committee.

This standard is a revision of SS ISO 22000 : 2016 'Food safety management systems – Requirements for any organisation in the food chain'. It is an identical adoption of ISO 22000:2018, published by the International Organization for Standardization.

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. Enterprise Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

- 1. Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions.*
- 2. An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR.*
- 3. Compliance with a SS or TR does not exempt users from any legal obligations.*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 17, *Management systems for food safety*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

This second edition cancels and replaces the first edition (ISO 22000:2005), which has been technically revised through the adoption of a revised clause sequence. It also incorporates the Technical Corrigendum ISO 22000:2005/Cor.1:2006.

The following annexes are included to provide the users of this document with further information:

- Annex A: cross references between the CODEX HACCP principles and this document;
- Annex B: cross reference between this document and ISO 22000:2005.

Introduction

0.1 General

The adoption of a food safety management system (FSMS) is a strategic decision for an organization that can help to improve its overall performance in food safety. The potential benefits to an organization of implementing a FSMS based on this document are:

- a) the ability to consistently provide safe foods and products and services that meet customer and applicable statutory and regulatory requirements;
- b) addressing risks associated with its objectives;
- c) the ability to demonstrate conformity to specified FSMS requirements.

This document employs the process approach (see 0.3), which incorporates the Plan-Do-Check-Act (PDCA) cycle (see 0.3.2) and risk-based thinking (see 0.3.3).

This process approach enables an organization to plan its processes and their interactions.

The PDCA cycle enables an organization to ensure that its processes are adequately resourced and managed, and that opportunities for improvement are determined and acted on.

Risk-based thinking enables an organization to determine the factors that could cause its processes and its FSMS to deviate from the planned results, and to put in place controls to prevent or minimize adverse effects.

In this document, the following verbal forms are used:

- “shall” indicates a requirement;
- “should” indicates a recommendation;
- “may” indicates a permission;
- “can” indicates a possibility or a capability.

“NOTES” provide guidance in understanding or clarifying the requirements in this document.

0.2 FSMS principles

Food safety is related to the presence of food safety hazards at the time of consumption (intake by the consumer). Food safety hazards can occur at any stage of the food chain. Therefore, adequate control throughout the food chain is essential. Food safety is ensured through the combined efforts of all the parties in the food chain. This document specifies the requirements for a FSMS that combines the following generally recognized key elements:

- interactive communication;
- system management;
- prerequisite programmes;
- hazard analysis and critical control point (HACCP) principles.

In addition, this document is based on the principles that are common to ISO management system standards. The management principles are:

- customer focus;
- leadership;
- engagement of people;
- process approach;
- improvement;
- evidence-based decision making;
- relationship management.

0.3 Process approach

0.3.1 General

This document adopts a process approach when developing and implementing a FSMS and improving its effectiveness to enhance production of safe products and services while meeting applicable requirements. Understanding and managing interrelated processes as a system contributes to the organization's effectiveness and efficiency in achieving its intended results. The process approach involves the systematic definition and management of processes, and their interactions, so as to achieve the intended results in accordance with the food safety policy and strategic direction of the organization. Management of the processes and the system as a whole can be achieved using the PDCA cycle, with an overall focus on risk-based thinking aimed at taking advantage of opportunities and preventing undesirable results.

The recognition of the organization's role and position within the food chain is essential to ensure effective interactive communication throughout the food chain.

0.3.2 Plan-Do-Check-Act cycle

The PDCA cycle can be described briefly as follows:

Plan: establish the objectives of the system and its processes, provide the resources needed to deliver the results, and identify and address risks and opportunities;

Do: implement what was planned;

Check: monitor and (where relevant) measure processes and the resulting products and services, analyse and evaluate information and data from monitoring, measuring and verification activities, and report the results;

Act: take actions to improve performance, as necessary.

In this document, and as illustrated in Figure 1, the process approach uses the concept of the PDCA cycle at two levels. The first covers the overall frame of the FSMS (Clause 4 to Clause 7 and Clause 9 to Clause 10). The other level (operational planning and control) covers the operational processes within the food safety system as described in Clause 8. Communication between the two levels is therefore essential.

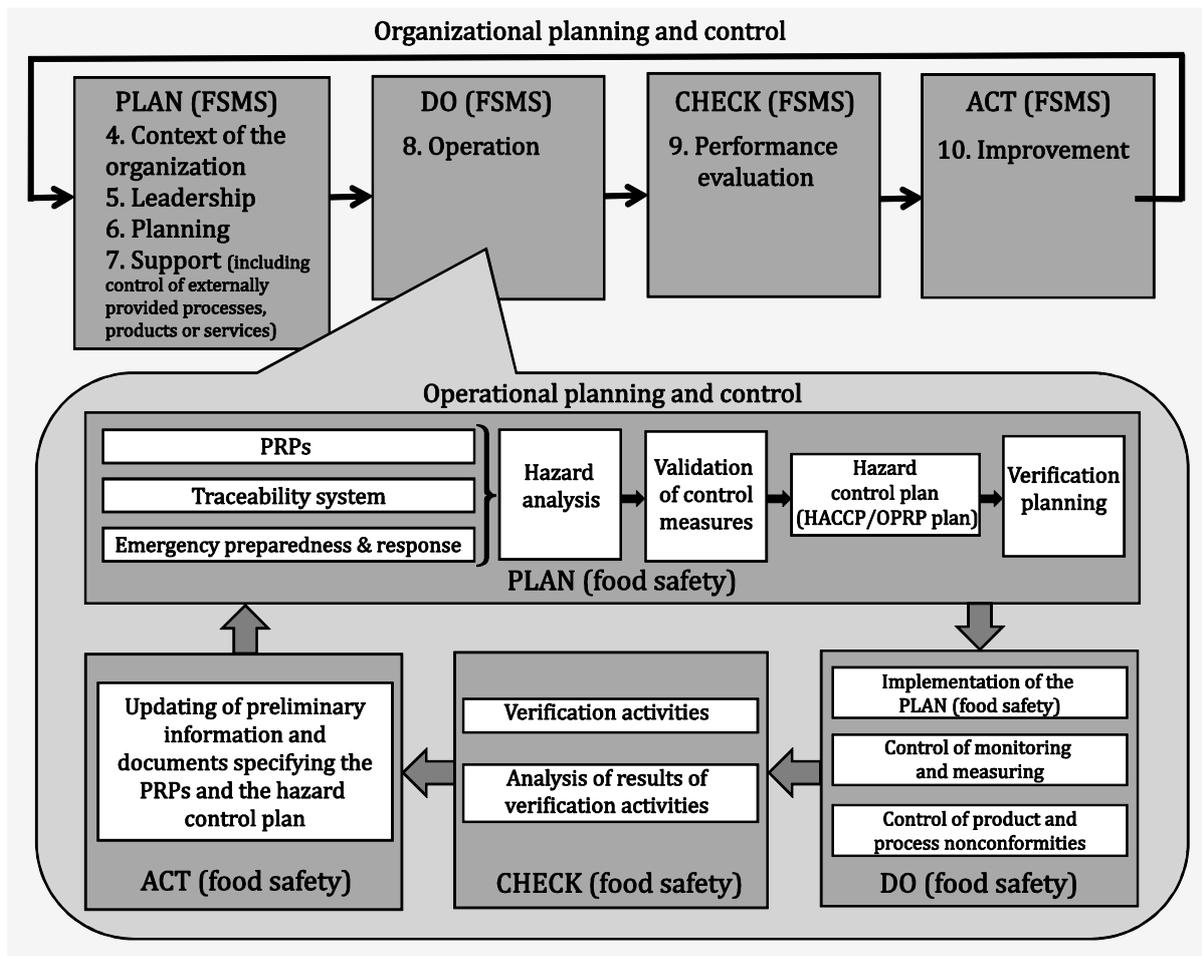

Figure 1 — Illustration of the Plan-Do-Check-Act cycle at the two levels

0.3.3 Risk-based thinking

0.3.3.1 General

Risk-based thinking is essential for achieving an effective FSMS. In this document, risk-based thinking is addressed on two levels, organizational (see 0.3.3.2) and operational (see 0.3.3.3), which is consistent with the process approach described in 0.3.2.

0.3.3.2 Organizational risk management

Risk is the effect of uncertainty, and any such uncertainty can have positive or negative effects. In the context of organizational risk management, a positive deviation arising from a risk can provide an opportunity, but not all positive effects of risk result in opportunities.

To conform to the requirements of this document, an organization plans and implements actions to address organizational risks (Clause 6). Addressing risks establishes a basis for increasing the effectiveness of the FSMS, achieving improved results and preventing negative effects.

0.3.3.3 Hazard analysis — Operational processes

The concept of risk-based thinking based on the HACCP principles at the operational level is implicit in this document.

The subsequent steps in HACCP can be considered as the necessary measures to prevent hazards or reduce hazards to acceptable levels to ensure food is safe at the time of consumption (Clause 8).

Decisions taken in the application of HACCP should be based on science, free from bias and documented. The documentation should include any key assumptions in the decision-making process.

0.4 Relationship with other management system standards

This document has been developed within the ISO high level structure (HLS). The objective of the HLS is to improve alignment between ISO management system standards. This document enables an organization to use the process approach, coupled with the PDCA cycle and risk-based thinking, to align or integrate its FSMS approach with the requirements of other management systems and supporting standards.

This document is the core principle and framework for FSMSs and sets out the specific FSMS requirements for organizations throughout the food chain. Other guidance related to food safety, specifications and/or requirements specific to food sectors can be used together with this framework.

In addition, ISO has developed a family of associated documents. These include documents for:

- prerequisite programmes (ISO/TS 22002 series) for specific sectors of the food chain;
- requirements for auditing and certification bodies;
- traceability.

ISO also provides guidance documents for organizations on how to implement this document and related standards. Information is available on the ISO website.

Food safety management systems – Requirements for any organization in the food chain

1 Scope

This document specifies requirements for a food safety management system (FSMS) to enable an organization that is directly or indirectly involved in the food chain:

- a) to plan, implement, operate, maintain and update a FSMS providing products and services that are safe, in accordance with their intended use;
- b) to demonstrate compliance with applicable statutory and regulatory food safety requirements;
- c) to evaluate and assess mutually agreed customer food safety requirements and to demonstrate conformity with them;
- d) to effectively communicate food safety issues to interested parties within the food chain;
- e) to ensure that the organization conforms to its stated food safety policy;
- f) to demonstrate conformity to relevant interested parties;
- g) to seek certification or registration of its FSMS by an external organization, or make a self-assessment or self-declaration of conformity to this document.

All requirements of this document are generic and are intended to be applicable to all organizations in the food chain, regardless of size and complexity. Organizations that are directly or indirectly involved include, but are not limited to, feed producers, animal food producers, harvesters of wild plants and animals, farmers, producers of ingredients, food manufacturers, retailers, and organizations providing food services, catering services, cleaning and sanitation services, transportation, storage and distribution services, suppliers of equipment, cleaning and disinfectants, packaging materials and other food contact materials.

This document allows any organization, including small and/or less developed organizations (e.g. a small farm, a small packer-distributor, a small retail or food service outlet) to implement externally-developed elements in their FSMS.

Internal and/or external resources can be used to meet the requirements of this document.
