This Singapore Standard was approved by the Biomedical Standards Committee on behalf of the Singapore Standards Council on 23 September 2016.

First published, 2016

The Biomedical Standards Committee, appointed by the Standards Council, consists of the following members:

	Name	Capacity
Acting Chairman	: Mr Foo Yang Tong	<i>Individual Capacity</i>
Advisor	: Ms Jacqueline Monteiro	<i>Individual Capacity</i>
Secretary	: Mr Choi Kwok Keong	<i>Singapore Manufacturing Federation – Standards Development Organisation</i>
Members	: Mr David Barda	<i>Exploit Technologies Pte Ltd</i>
	Prof Kishore Bhakoo	<i>Singapore Bioimaging Consortium</i>
	Ms Sheryl Chen	<i>Economic Development Board</i>
	Mr Chung Kwong Yuew	<i>Temasek Polytechnic</i>
	Ms Farah Binte Mohamed Haniff	<i>National Healthcare Group Pte Ltd</i>
	Prof James Goh	<i>Biomedical Engineering Society (Singapore)</i>
	Dr Stuart Koe	<i>Singapore Manufacturing Federation</i>
	Ms Evelyn Koh	<i>Ministry of Manpower</i>
	Mr Kwan Fook Weng	<i>Singhealth Services Pte Ltd</i>
	Ms Kwek Puay Ee	<i>Singapore Nursing Board</i>
	Ms Veon Lee	<i>Biomedical Research Council</i>
	Assoc Prof Leo Hwa Liang	<i>National University of Singapore (Biomedical Engineering)</i>
	Dr Leonard Loh	<i>Nanyang Polytechnic</i>
	Assoc Prof Eddie Ng Yin Kwee	<i>Nanyang Technological University</i>
	Dr Ong Siew Hwa	<i>Individual Capacity</i>
	Mr Poo Yi Hong	<i>International Enterprise Singapore</i>
	Mr Johnny Teo	<i>SPRING Singapore</i>
	Ms Jocelyn Yen	<i>Singapore Manufacturing Federation</i>
	Dr Yong Chern Chet	<i>Individual Capacity</i>

The Working Group, appointed by the Biomedical Standards Committee to assist in the preparation of this standard, comprises the following experts who contribute in their *individual capacity*:

	Name
Convenor	: Dr Alain Khaiat
Deputy Convenor	: Mrs Marie Tham
Secretary	: Ms Cynthia Toh Sook Ai
Members	: Dr Maria Antipina Ms Stephanie Chan Dr Cheah Nuan Ping Dr Khoo Keng Meng Ms Innocentia M Krisnawati Mr Lam Kok Seng Dr Celine Valeria Liew Mr Mohanram Subramaniam Mr Pang Tit Keong Ms Josephine Song Mr Gary Yao

The organisations in which the experts of the Working Group are involved are:

Arch Chemicals Singapore Pte Ltd
Celblos Dermal Research Centre Pte Ltd
Cosmetic, Toiletry and Fragrance Association of Singapore
Health Sciences Authority
Institute of Materials Research and Engineering
Johnson and Johnson Asia Pacific
Lubrizol Southeast Asia Pte Ltd
National University of Singapore
Procter and Gamble International Operations
SC Solutions Pte Ltd
Singapore Polytechnic

National Foreword

This Singapore Standard was prepared by the Working Group on Cosmetics under the direction of the Biomedical Standards Committee.

This Singapore Standard is an identical adoption of International Standard ISO 16128-1:2016 “Guidelines on technical definitions and criteria for natural and organic cosmetic ingredients and products — Part 1: Definitions for ingredients” published by the International Organization for Standardization.

Where appropriate, the words ‘International Standard’ shall be read as ‘Singapore Standard’.

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. Enterprise Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

1. *Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions.*
2. *An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR.*
3. *Compliance with a SS or TR does not exempt users from any legal obligations.*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 217, *Cosmetics*.

ISO 16128 consists of the following parts, under the general title *Guidelines on technical definitions and criteria for natural and organic cosmetic ingredients and products*:

— *Part 1: Definitions for ingredients*

The following part is under preparation:

— *Part 2: Criteria for ingredients and products*

Introduction

ISO 16128 provides guidelines on definitions and criteria for natural and organic cosmetic ingredients and products. These guidelines are specific to the cosmetics sector, taking into account that most existing approaches written for the agricultural and food sector are not directly transferrable to cosmetics. They apply scientific judgment and offer principles towards a consistent logical framework for natural and organic cosmetic ingredients and products incorporating common approaches employed in existing references. The purpose of these guidelines is to encourage a wider choice of natural and organic ingredients in the formulation of a diverse variety of cosmetic products to encourage innovation.

However, it is common, based on other references in the public domain, to cover criteria for ingredients, as well as definitions and criteria for finished products. This will be covered in ISO 16128-2, which will build on and enhance this part.

Guidelines on technical definitions and criteria for natural and organic cosmetic ingredients and products

— Part 1: Definitions for ingredients

1 Scope

This part of ISO 16128 provides guidelines on definitions for natural and organic cosmetic ingredients.

In addition to natural and organic ingredients, other ingredient categories which may be necessary for natural and organic product development are defined with associated restrictions.

ISO 16128 does not address product communication (e.g. claims and labelling), human safety, environmental safety and socio-economic considerations (e.g. fair trade), and the characteristics of packaging materials or regulatory requirements applicable for cosmetics.
