Foreword

This Technical Reference (TR) was prepared by the Working Group on Water Safety : Aquatic Facilities set up by the Technical Committee on Workplace Safety and Health under the purview of the Quality and Safety Standards Committee.

This Technical Reference (TR) is a provisional standard made available for application over a period of three years. The aim is to use the experience gained to update the TR so that it can be adopted as a Singapore Standard. Users of the TR are invited to provide feedback on its technical content, clarity and ease of use. Feedback can be submitted using the form provided in the TR. At the end of the three years, the TR will be reviewed, taking into account any feedback or other considerations, to further its development into a Singapore Standard if found suitable.

It is presupposed that in the course of their work, users will comply with all relevant regulatory and statutory requirements. Some examples of relevant regulations and acts are listed in the Bibliography. The Singapore Standards Council and Enterprise Singapore will not be responsible for identifying all of such legal obligations.

Acknowledgement is made to Royal Life Saving Society Australia and SportSG for their kind permission to reproduce materials from the following documents into the TR:

1. Guidelines for Safe Pool Operation – Royal Life Saving Society Australia
2. Preliminary – Major Accident Report and Major/Minor Incident Report – SportSG
3. ActiveSG Centres Emergency Action Plan – SportSG

Attention is drawn to the possibility that some of the elements of this TR should be the subject of patent rights. Enterprise Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

1. *Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions. Where SSs are deemed to be stable, i.e. no foreseeable changes in them, they will be classified as "Mature Standards". Mature Standards will not be subject to further review, unless there are requests to review such standards.*
2. *An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore and the Singapore Standards Council shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR. Although care has been taken to draft this standard, users are also advised to ensure that they apply the information after due diligence.*
3. *Compliance with a SS or TR does not exempt users from any legal obligations.*

Code of practice for water safety – Aquatic facilities

1 Scope

This Technical Reference (TR) specifies the general requirements for the prevention of drowning and injuries at aquatic facilities in Singapore.

The use of this TR does not exclude the exercise of good judgment and personal responsibility on the part of the reader.
