National Foreword

This National Annex was prepared by the Technical Committee on Civil and Geotechnical Works under the purview of the Building and Construction Standards Committee.

This standard is an adoption of UK National Annex to Eurocode 7: Geotechnical design – Part 2 : Ground investigation and testing and is implemented with the permission of British Standards Publishing Ltd.

Acknowledgement is made to BSI for the use of information from the above publications.

This Singapore NA contains information on those parameters which are left open in EN 1997-2 for national choice, known as nationally determined parameters. The Singapore NA is to be read in conjunction with the SS EN 1997-2: 2010 – Eurocode 7: Geotechnical design – Part 2: Ground investigation and testing.

At the time of publication, this standard is expected to be used as a reference in the Building and Construction Authority's 'Approved Document – Acceptable Solutions'.

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. SPRING Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

- 1. Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions. Where SSs are deemed to be stable, i.e. no foreseeable changes in them, they will be classified as "mature standards". Mature standards will not be subject to further review unless there are requests to review such standards.*
- 2. An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore and the Singapore Standards Council shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR. Although care has been taken to draft this standard, users are also advised to ensure that they apply the information after due diligence.*
- 3. Compliance with a SS or TR does not exempt users from any legal obligations.*

National Annex (informative) to SS EN 1997-2 : 2010, Eurocode 7 : Geotechnical design – Part 2 : Ground investigation and testing

NA.1 Scope

There are no Nationally Determined Parameters in SS EN 1997-2:2010. This National Annex contains all the information concerning the application of SS EN 1997-2:2010 in Singapore.

This National Annex gives:

- a) Singapore decisions on the status of SS EN 1997-2:2010 informative annexes; and
- b) references to non-contradictory complementary information.
