SS ISO/IEC 17000:2024

National Foreword

This Singapore Standard was prepared by the Working Group on Management Systems and Others (also known as the National Mirror Working Group on ISO Committee for Conformity Assessment (CASCO)) set up by the Technical Committee on Conformity Assessment (CASCO) under the purview of the Safety and Quality Standards Committee.

This standard is a revision of SS ISO/IEC 17000:2017 and it is an identical adoption of ISO/IEC 17000:2020, "Conformity assessment – Vocabulary and general principles", published by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC).

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. Enterprise Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

- Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions. Where SSs are deemed to be stable, i.e. no foreseeable changes in them, they will be classified as "mature standards". Mature standards will not be subject to further review, unless there are requests to review such standards.
- 2. An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore and the Singapore Standards Council shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR. Although care has been taken to draft this standard, users are also advised to ensure that they apply the information after due diligence.
- 3. Compliance with a SS or TR does not exempt users from any legal obligations.

ISO/IEC 17000:2020(E)

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see http://www.iso.org/patents) or the IEC list of patent declarations received (see http://www.iso.org/patents) or the IEC list of patent declarations received (see http://www.iso.org/patents) or the IEC list of patent declarations received (see http://www.iso.org/patents) or the IEC list of patent declarations received (see http://wwww.iso.org/patents) or the IEC list of patent declarations received (see http://wwww.iso.org/patents) or the IEC list of patent declarations received (see http://www.iso.org/patents) or the list of patents and the second set of the set of the seco

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see <u>www.iso.org/</u><u>iso/foreword.html</u>.

This document was prepared by the ISO Committee on Conformity Assessment (CASCO).

This second edition cancels and replaces the first edition (ISO/IEC 17000:2004), which has been technically revised.

The main changes compared to the previous edition are as follows:

- addition of new terms: "object of conformity assessment" (see <u>4.2</u>), "owner" (see <u>4.13</u>), "impartiality" (see <u>5.3</u>), "independence" (see <u>5.4</u>), "validation" (see <u>6.5</u>), "verification" (see <u>6.6</u>), "decision" (see <u>7.2</u>), "expiry" (see <u>8.4</u>) and "restoration" (see <u>8.5</u>);
- change of concept of conformity assessment system;
- deletion of the definition of the term "product" from the body of the document and addition to <u>Annex B</u>;
- editorial revision of <u>Annex A</u> limited to changes in the terms and definitions in <u>Clauses 4</u> to <u>9</u>;
- extension of <u>Annex B</u>.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at <u>www.iso.org/members.html</u>.

This corrected version of ISO/IEC 17000:2020 corrects the price indication. The technical content remains unchanged.

Introduction

The ISO Committee on conformity assessment (CASCO) develops International Standards relating to conformity assessment activities such as testing, inspection and various forms of certification. For many years, ISO/IEC Guide 2 included a core vocabulary for conformity assessment, built up from a small number of terms and definitions first compiled to facilitate communication and understanding about product certification based on standards for traditional manufactured goods.

In 2000, CASCO decided to remove conformity assessment terminology from ISO/IEC Guide 2 and provide instead a self-contained vocabulary more readily applicable within the planned international standards on conformity assessment and in the drafting or revision of related documents. The first edition of this document was published in 2004, as a consistent framework within which more specific concepts could be defined appropriately and denoted by the most appropriate terms.

Additional concepts unique to particular activities such as accreditation, certification of persons and use of marks of conformity are not included in this document but are provided in International Standards related to those activities.

Terms and definitions related to trade and regulation are given in <u>Clause 9</u>. These are intended not only to standardize usage within the conformity assessment community, but also to help policy makers concerned with the facilitation of trade within regulatory and international treaty frameworks.

The terms and definitions specified in this document, particularly in <u>Clauses 6</u> and <u>7</u>, reflect the adoption by CASCO in November 2001 of the functional approach.

To provide a better understanding of the defined concepts, their grouping and their relationships, a description of the functional approach is included in <u>Annex A</u> for information.

The terms included in this document relate to concepts considered essential to define. General terms used to denote conformity assessment concepts for which common language usage is sufficient are not included in this document. Terms not common across all International Standards for conformity assessment and with definitions specific to a particular application are not included in this document but are included in the specific relevant standard.

Relevant terms defined in other documents are listed in <u>Annex B</u>:

- terms applicable to specific aspects of conformity assessment, as defined in other conformity assessment standards;
- terms generally applicable in conformity assessment contexts for which definitions are published outside conformity assessment standards.

SS ISO/IEC 17000:2024

Conformity assessment — Vocabulary and general principles

1 Scope

This document specifies general terms and definitions relating to conformity assessment (including the accreditation of conformity assessment bodies) and to the use of conformity assessment to facilitate trade.

The general principles of conformity assessment and a description of the functional approach to conformity assessment are provided in <u>Annex A</u>.

Conformity assessment interacts with other fields such as management systems, metrology, standardization and statistics. The boundaries of conformity assessment are not defined in this document.
