Information Technology Standards Committee

Pioneering the possibility of digital age living

Initiated by

SINGAPORE STANDARDS COUNCIL

SPRING singapore
Enabling Enterprise

What we do

The Information Technology Standards Committee, under the Singapore Standards Council, spearheads the development and promotion of information technology standards in Singapore.

Under our purview, various Technical Committees and Working Groups are formed. They actively monitor and participate in the development and review of international standards that are of importance to Singapore, including those pertaining to new technologies and in emerging industries. These committees are instrumental in encouraging organisations to adopt best practices which will improve interoperability, cross-compatibility and integration of information technology for the social and economic betterment of Singapore.

As a national standards body, SPRING Singapore administers the Singapore Standardisation Programme under the guidance of an industry-led Singapore Standards Council.

Key areas

- Automatic data capture
- Biometrics
- Building and construction industry information technology
- Cards and personal identification
- e-Financial services
- Green information technology
- Health informatics
- Intelligent transport systems
- Internet of Things
- IT governance
- Multimedia representation

Who we are

Our committees and working groups comprise standards partners from educational institutions, government agencies, industry associations and professional bodies with vast experience in the industry.

Listed below are some of the key organisations with partners involved in our work:

Educational Institutions
- Nanyang Polytechnic
- National University of Singapore
- Singapore Management University
- Singapore Polytechnic

Government Agencies
- Defence Science and Technology Agency
- Infocomm Media Development Authority
- Institute for Infocomm Research
- National Research Foundation

Industry Associations & Professional Bodies
- Association of Small and Medium Enterprises
- Information Technology Management Association
- Internet Society (Singapore Chapter)
- Singapore Computer Society
- Singapore Infocomm Technology Federation

Representatives from large, small & medium enterprises are also actively involved in our work.

Get involved as a Standards Partner today

Participating in standardisation work allows you to stay in the forefront of the latest regional and international developments that are relevant to your industry. It also provides opportunities for you to network with the experts and key players in the industry. If you are interested to play a part in shaping the future standardisation landscape in Singapore, we welcome you to join us as a Standards Partner.
