## Environment Standards Committee

Driving business growth through sustainability

Initiated by

**SPRING**  
singapore  
Enabling Enterprise

## What we do

The Environment Standards Committee, under the Singapore Standards Council, spearheads the development and promotion of environmental and solid waste management standards.

Under our purview, various Technical Committees and Working Groups are formed. They protect Singapore's interest through participation in the development and review of environmental standards on the international platform. They are instrumental in preparing Singapore industries to address climate change challenges and ensure long-term environmental sustainability. The committees encourage businesses to adopt best practices to improve their quality, safety and productivity.

As a national standards body, SPRING Singapore administers the Singapore Standardisation Programme under the guidance of an industry-led Singapore Standards Council.

## Key areas

- Composting
- Environmental auditing and certification systems
- Environmental labelling of products
- Environmental management systems
- Management of greenhouse gas emissions
- Product life cycle assessment
- Solid waste management

## Major Singapore Standards

SS 594:2014	Terminology for waste management
SS ISO 14001:2015	Environmental management systems – Requirements with guidance for use
SS ISO 14004:2016	Environmental management systems – General guidelines on implementation

## Who we are

Our committees and working groups comprise standards partners from educational institutions, government agencies, industry associations and professional bodies with vast experience in the industry.

Listed below are some of the key organisations with partners involved in our work:

### Educational Institutions

- National University of Singapore
- Ngee Ann Polytechnic

### Government Agencies

- Building and Construction Authority
- Centre for Liveable Cities
- Ministry of the Environment and Water Resources
- Ministry of Trade and Industry
- National Climate Change Secretariat
- National Environment Agency
- PUB, the National Water Agency
- Singapore Institute of Manufacturing Technology

### Industry Associations & Professional Bodies

- Singapore Business Federation
- Singapore Chemical Industry Council
- Singapore Green Building Council
- Sustainable Energy Association of Singapore
- Waste Management & Recycling Association of Singapore

Representatives from large, small & medium enterprises are also actively involved in our work.

## Get involved as a Standards Partner today

Participating in standardisation work allows you to stay in the forefront of the latest regional and international developments that are relevant to your industry. It also provides opportunities for you to network with the experts and key players in the industry. If you are interested to play a part in shaping the future standardisation landscape in Singapore, we welcome you to join us as a Standards Partner.
