CLAUSES

NA.1 Scope 7

NA.2 Nationally determined parameters 7

NA.3 Decisions on the status of informative annexes 24

NA.4 References to non-contradictory complementary information 24

TABLES

NA.1 Nationally determined parameters described in SS EN 1992-1-1 : 2008 8

NA.2 Recommendations for normal-weight concrete quality for exposure classes XC, XD and XS and cover to reinforcement for a 50 year intended working life and 20 mm maximum aggregate size 20

NA.3 Recommendations for normal-weight concrete quality for exposure class XC and cover to reinforcement for a 100 year intended working life and 20 mm maximum aggregate size 22

NA.4 Recommended values of w_{max} 23

NA.5 Basic ratios of span / effective depth for reinforced concrete members without axial compressions 23

NA.6a Minimum mandrel diameter to avoid damage to reinforcement for bars and wire 24

NA.6b Minimum mandrel diameter to avoid damage to reinforcement for welded reinforcement and fabrics bent after welding 24

National Foreword

This National Annex (NA) was prepared by the Technical Committee on Building Structure and Sub-structure under the purview of the Building and Construction Standards Committee.

This standard is an adoption of UK National Annex to Eurocode 2 : Design of concrete structures – Part 1-1 : General rules and rules for buildings and is implemented with the permission of British Standards Publishing Ltd.

In preparing this standard, reference was also made to PD 6687 : 2006 – Background paper to the UK National Annexes to BS EN 1992-1.

Acknowledgement is made to BSI for the use of information from the above publications.

This Singapore NA contains information on those parameters which are left open in EN 1992-1-1 for national choice, known as nationally determined parameters. The Singapore NA is to be read in conjunction with the SS EN 1992-1-1 : 2008 – Eurocode 2 : Design of concrete structures – Part 1-1 : General rules and rules for buildings.

At the time of publication, this standard is expected to be used as a reference in the Building and Construction Authority's 'Approved Document – Acceptable Solutions'.

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. SPRING Singapore shall not be held responsible for identifying any or all of such patent rights.

NOTE

1. *Singapore Standards are subject to periodic review to keep abreast of technological changes and new technical developments. The changes in Singapore Standards are documented through the issue of either amendments or revisions.*

2. *Compliance with a Singapore Standard does not exempt users from legal obligations.*
